

⚡ **Strategic Position:** The global AIOps market will reach \$32.5B by 2030. TellMAX.AI acts as the active operational execution engine that turns Splunk and Cisco telemetry into closed-loop remediation.

1. STRATEGIC PROBLEM & TOTAL OPPORTUNITY

The global AIOps market is projected to reach **\$32.5 Billion by 2030** (Source: MarketsandMarkets AIOps Global Forecast). As enterprises digitize critical infrastructure, telemetry volume from IT and OT environments has overwhelmed human capacity, stretching incident resolution times (MTTR) to 45-90 minutes. **TellMAX.AI eliminates operational friction by serving as the digital clone of the network engineer — always on site, always available.** MAX unifies Splunk, Meraki, Catalyst Center, Cisco Spaces, Webex, and Cisco Duo Security into a single natural execution engine.

2. THREE CORE BREAKTHROUGHS

- **1. The Brain of Splunk:** Acts as Splunk's "frontal lobe" — translating raw SPL telemetry into human dialogue, cross-referencing IT/OT context with technical manuals via RAG, and making autonomous decisions in <5 seconds.
- **2. Partner Superpowers & MTTR Reduction:** Cuts L0/L1 incident resolution time by up to **85%** (Source: TellMAX.AI Production Benchmark). Hands-free voice (via Cisco CUBE + Webex Calling) enables engineers to execute cable tests and port bounces on the move.
- **3. Sovereign Architecture (UCS AI Pods):** Migration path to run 100% on-premise on Cisco UCS AI Pods — zero data leakage for regulated enterprise datacenters.

3. MARKET OPPORTUNITY (TAM / SAM / SOM)

TAM: GLOBAL AIOPS MARKET

\$32.5B

Global AIOps opportunity by 2030 (Source: MarketsandMarkets Forecast).

SAM (PARTNER OPPORTUNITY)

\$300M-\$500M

~15,000 Cisco MSP contracts in EMEAR/Americas @ \$15k-\$35k ARR overlay.

SOM (CISCO LIFECYCLE VALUE)

25%-40%

Expansion in MSP contract ARR + higher subscription renewal & retention.

4. CISCO TECH ALIGNMENT & VERIFIED ECONOMIC DATA

TellMAX.AI directly aligns with the **Cisco 360 Partner Program** by driving active feature consumption, improving customer retention, and strengthening subscription renewals across core Cisco BUs.

TARGET VERTICAL	INDUSTRY ECONOMIC IMPACT & VERIFIED SOURCE	CISCO BU IMPACT & SECURITY INTEGRATION
1. Manufacturing & Industrial	\$39,000 / minute downtime cost (\$2.3M+/hr) in SCADA production. (Source: Siemens Downtime Report)	Splunk OT Security + Catalyst 9000 IE + Meraki MT IoT Sensors + Catalyst Center APIs.
2. Financial Services & Banking	\$5.6M / hour transaction outage cost + EU DORA fines up to 2% global revenue. (Source: Gartner Financial Infrastructure)	Splunk Enterprise Security + Cisco Duo RBAC + Catalyst Zero Trust Microsegmentation + ThousandEyes.
3. Healthcare & Life Sciences	\$8,600 - \$15,000 / minute outage cost across 15-20 medical IoT devices per bed. (Source: Gartner Healthcare IT Risk)	Meraki MR (Wi-Fi 6E/7 Clinical Wireless APIs) + Meraki MT + Cisco Spaces Asset Tracking + Splunk ITSI.
Live Pilot Proof Point	Cap Vermell Grand Hotel: 5-star luxury resort (Mallorca) active in live production (HVAC & NetOps).	Splunk HEC + Meraki Dashboard API + BACnet/IP BMS + Webex / ToIP Ext 1999 Voice.

Cisco Executive Alignment (Source: Cisco Systems Financial Earnings Transcript):

- **CEO Chuck Robbins:** Enterprise demand for AI and operational automation is directly accelerating customer commitment to Cisco's core observability and networking portfolio.

5. TWO-TRACK COMMERCIAL & TECHNICAL ROADMAP

GTM Roadmap: Active Production Pilot (Cap Vermell) ✅ → Q4'26 Manufacturing & Healthcare 2 Beta Pilots Ready to Launch → Q1'27 GA v1.0 → Q2'27 Splunkbase & Cisco DevNet Listing.

Tech Roadmap: Phase 1 (Webex/Telegram/Splunk HEC Cloud) → Phase 2 (Cisco CUBE Ext. 1999 Voice) → Phase 3 (Sovereign UCS AI Pods Package).
